

The Wireless Building

Explore the possibilities of the Eltako Wireless Building and offer your customers the most diverse solutions in the building installation.

Benefiting from EnOcean technology the low maintenance and easy to install system offers significant competitive advantages over a wired installation.

For a quick start there are two useful wireless sets available.

Start with these basic options and then expand without any problems step by step as needed. Compared to a conventional solution you can increase your living comfort and reduce energy costs.

Blister pack "dimming"

The blister pack "dimming" consists of a batteryless and wireless pushbutton **FT55** in pure white and an universal dimmer switch **FUD61NPN-230V**. The dimmer automatically recognizes the lamp type and allows the adjustment of the minimum brightness and dimming speed.
